Executive Value Proposition

We help organizations design, modernize and operate technology with **impact** and **confidence**.

ENTERPRISE ARCHITECTURE

Designing scalable and sustainable technology landscapes aligned with business strategy.

CLOUD TRANSFORMATION

Modernizing platforms through cloud-native architectures to drive agility, resilience and value.

QUALITY ENGINEERING

Improving delivery quality through governance, automation and continuous improvement.

DIGITAL HEALTH

Enabling healthcare interoperability and digital transformation with secure, reliable solutions.

SYSTEMS INTEGRATION

Connecting business-critical systems and platforms to deliver seamless experiences and measurable outcomes.

Helping organizations **reduce technology risk**, **improve quality** and **accelerate delivery**.

Experience. Expertise. Results.

25+ Years • 30+ Projects • Senior Profiles

Proven Experience

Over 25 years delivering **high-impact** technology solutions for leading organizations.

Successful Delivery

More than **30** completed projects across multiple industries and geographies with **measurable results**.

Senior Expertise

Senior consultants and engineers with **deep domain knowledge** and hands-on leadership.

Helping organizations **reduce technology risk**, **improve quality** and **accelerate delivery**.

Clients & Partners

Trusted by leading organizations to solve **complex challenges** and achieve **meaningful results**.

Public Sector

Supporting government agencies and public institutions to deliver better services to citizens.

Healthcare

Supporting healthcare services and digital health transformation across regions.

Banking & Financial Services

Partnering with leading financial institutions to drive innovation and operational excellence.

Industry, Retail & Tourism

Helping global brands and companies transform operations and enhance customer experiences.

International Organizations & Sports

Working with international organizations and sports entities on mission-critical initiatives.

For the Game. For the World.

Technology & Strategic Partners

Long-term relationships built on **trust**, **transparency** and **shared success**.

Senior leadership. Real experience. Tangible results.

OIKOS brings together senior professionals with deep expertise and a proven track record leading complex initiatives from **strategy to delivery**.

Enterprise Architecture

Designing scalable, secure and future-ready architectures aligned with business strategy.

Cloud Transformation

Enabling business agility and innovation through modern cloud platforms and practices.

Program & Project Leadership

Delivering complex programs and projects on time, on budget and with measurable impact.

Quality Engineering

Ensuring quality at every stage with test strategy, automation and continuous improvement.

Integration Architecture

Connecting systems, data and people using robust integration patterns, APIs and event-driven solutions.

Digital Health Expertise

Deep domain knowledge in healthcare solutions with a focus on patient outcomes and operational excellence.

Leadership that combines vision, architecture and execution to transform technology into **business value**.

We partner with organizations across key sectors and geographies.

Public Sector • Banking • Healthcare • International

Public Sector

Supporting **government** agencies in **modernizing** and delivering citizen-centric digital services.

Banking

Helping **financial institutions** innovate securely and improve **operational** efficiency.

Healthcare

Enabling **healthcare** organizations to enhance care delivery through **digital** transformation.

International Organizations

Collaborating with international entities to deliver **sustainable**, scalable and **impactful** technology solutions.

Helping organizations **reduce technology risk**, **improve quality** and **accelerate delivery**.

Deep expertise across key industries.

Public 35% • Banking 25% • Healthcare 20% • International 20%

Public Sector

35%

Supporting **government** agencies in **modernizing** and delivering citizen-centric digital services.

Banking

25%

Helping **financial** institutions innovate securely and improve **operational efficiency**.

Healthcare

20%

Enabling **healthcare** organizations to enhance care delivery through **digital transformation**.

International

20%

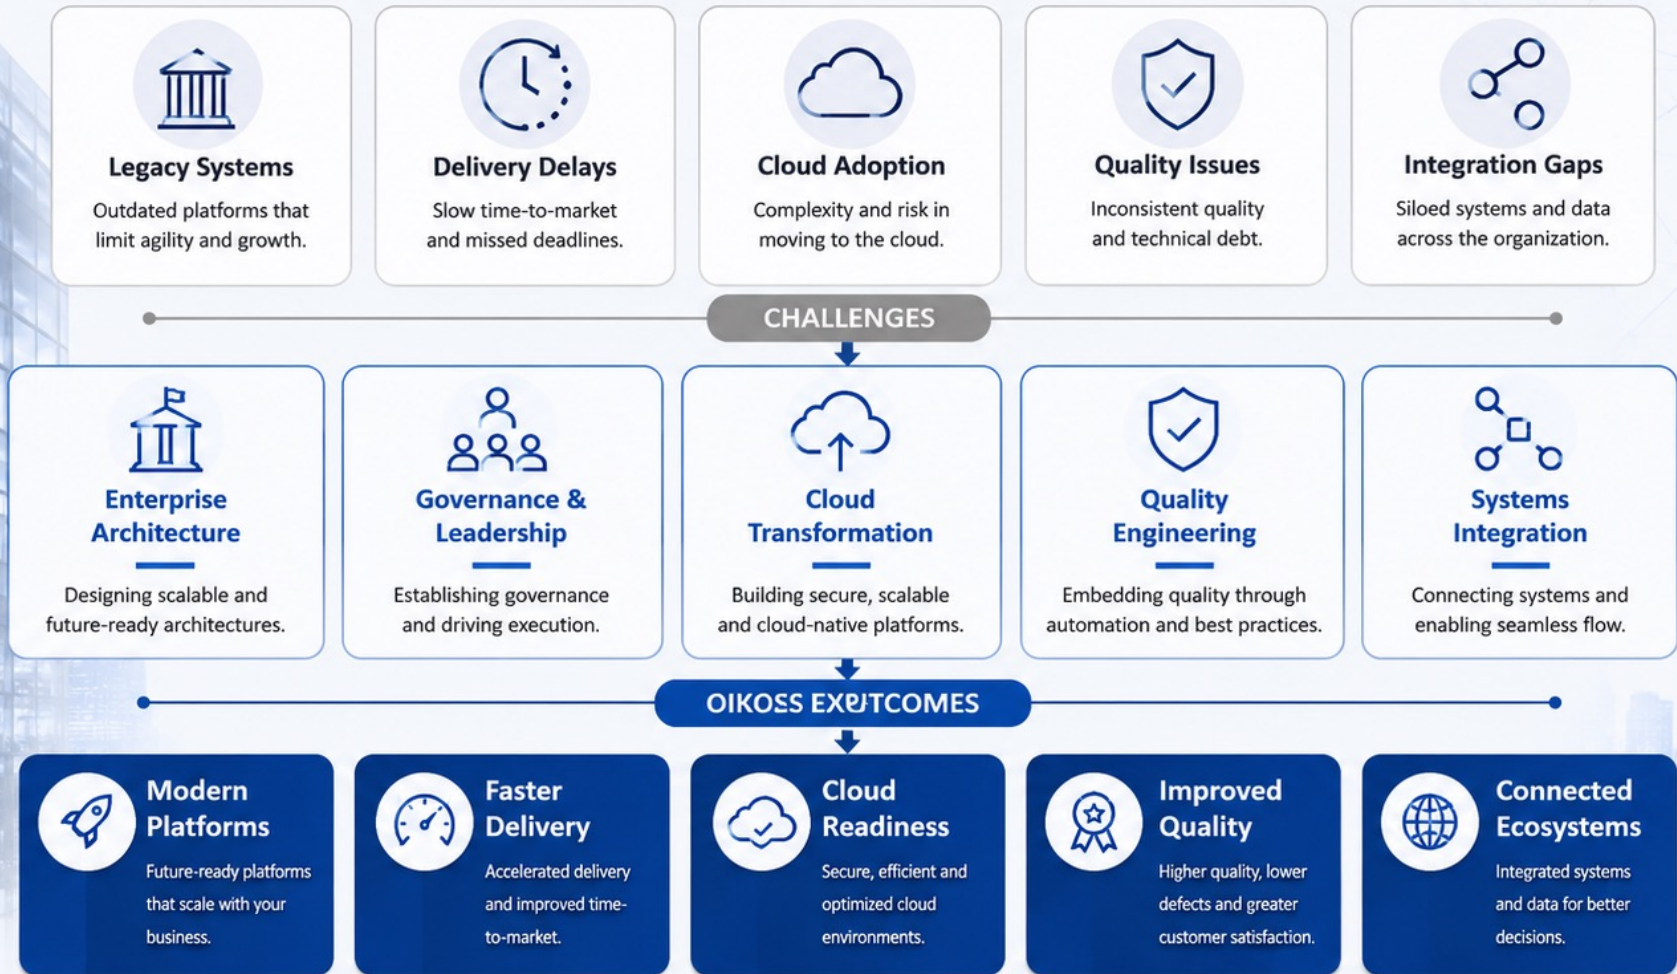

Collaborating with **international organizations** to deliver **sustainable, scalable** solutions.

Helping organizations **reduce technology risk, improve quality** and **accelerate delivery**.

From Challenges to Results

Helping organizations **overcome complexity** and **accelerate transformation**.

Transforming technology challenges into **measurable business value**.

Public Sector Transformation

Supporting national, regional and European public organizations in **digital transformation** initiatives.

National Youth Guarantee Platform

- Oracle 19c Exadata
- Performance optimization
- Large-scale data processing
- Reporting modernization

- ✓ Improved scalability
- ✓ Reduced processing times

Healthcare Interoperability

- Integration architecture
- Healthcare standards
- System interoperability
- Quality assurance

- ✓ Improved data exchange
- ✓ Better patient information flow

Enterprise System Modernization

- Enterprise Architecture
- Integration
- Governance
- QA Leadership

- ✓ Increased operational efficiency
- ✓ Improved service delivery

Key Capabilities Delivered

Enterprise Architecture

Cloud Transformation

Quality Engineering

Systems Integration

Performance Optimization

Delivering secure, scalable and efficient solutions that create **measurable impact** for public organizations.

Healthcare Transformation

Delivering interoperability, integration and **digital health solutions** across healthcare ecosystems.

FHIR • OpenShift • Kafka

Healthcare Interoperability

Standards-based integration

- HL7 FHIR
- Interoperability
- Patient data exchange
- API-first architecture

- ✓ Standardized information exchange
- ✓ Improved healthcare integration

Healthcare Platforms

Cloud-native healthcare solutions

- OpenShift
- Kubernetes
- Microservices
- CI/CD

- ✓ Scalable healthcare platforms
- ✓ Faster delivery cycles

Real-Time Healthcare Data

Event-driven healthcare architecture

- Kafka
- Streaming integration
- Real-time events
- Data synchronization

- ✓ Near real-time processing
- ✓ Improved system responsiveness

Key Capabilities Delivered

Digital Health

Interoperability & Standards

Cloud Platforms

Integration Excellence

Data Streaming

Empowering healthcare organizations to **improve patient outcomes** through connected, intelligent and scalable solutions.

Banking & Financial Services

Supporting financial institutions in **modernization**, **integration** and **digital transformation** initiatives.

Santander • BBVA • ING

Payments & Financial Platforms

- Payment ecosystems
- Integration architecture
- Digital transformation
- Enterprise solutions

- ✓ Faster service delivery
- ✓ Improved platform scalability

Enterprise Transformation

- Enterprise Architecture
- Cloud adoption
- Integration strategy
- Governance

- ✓ Modernized architecture
- ✓ Increased operational efficiency

Technology Modernization

- Microservices architecture
- DevOps adoption
- Agile delivery
- Cloud enablement

- ✓ Improved agility
- ✓ Faster time-to-market

Key Capabilities Delivered

Financial Platforms

Cloud Transformation

Systems Integration

Enterprise Architecture

Digital Transformation

Driving **innovation** and operational **excellence** for a more **connected** and **resilient** financial future.

Large Scale Digital Platforms

Delivering **large scale**, **secure** and **high-performance** digital platforms for **global organizations**.

FIFA®

Global Football Technology Platform

- Digital platforms for global operations
- High availability & performance
- Integration & data services
- Quality engineering

- ✓ Enhanced fan experience
- ✓ Reliable and scalable platforms

Digital Ecosystem for Football

- Broadcast & content platforms
- Real-time data & analytics
- Microservices architecture
- Continuous delivery

- ✓ Improved digital engagement
- ✓ Faster delivery of new features

European IP Digital Platform

- Large scale enterprise platform
- Secure & resilient architecture
- Integration & interoperability
- Quality & performance assurance

- ✓ High availability & reliability
- ✓ Efficient services for millions of users

Key Capabilities Delivered

Large Scale Platforms

High Availability & Resilience

Integration & Interoperability

Data & Analytics at Scale

Quality & Performance

Building global digital platforms that **connect**, **engage** and **deliver value** at scale.

Enterprise Transformation

Enabling leading organizations to **innovate**, **optimize** operations and deliver exceptional **customer experiences**.

Sustainable Infrastructure Transformation

- Digital platforms for asset management
- Integration & data architecture
- Process automation
- Cloud & analytics

- ✓ Improved operational efficiency
- ✓ Data-driven decision making

Digital & Operational Excellence

- Enterprise architecture
- System integration
- Performance optimization
- Quality engineering

- ✓ Enhanced customer experience
- ✓ Optimized operations at scale

Global Retail Transformation

- Omnichannel platforms
- Supply chain integration
- Data & analytics
- Cloud enablement

- ✓ Faster time-to-market
- ✓ Improved scalability & agility

Hospitality Digital Experience

- Digital guest experience platforms
- Mobile & web solutions
- System integration
- Cloud & DevOps

- ✓ Increased guest satisfaction
- ✓ Operational efficiency improvement

Key Capabilities Delivered

Customer Experience
Platforms

Quality &
Performance

Helping industry leaders **transform**, **innovate** and deliver **lasting value**.

SEPE

Modernizing data infrastructure to manage **massive volumes**, improve **performance** and ensure **scalability** for critical public services.

SEPE is the public entity responsible for employment services and benefits in Spain, managing critical data for millions of citizens and businesses.

Challenge

Millions of records and high demand workloads

3.000+
Million Records

Critical data to support citizens and businesses

Contribution

Implementation of **Oracle Exadata** to optimize performance, availability and scalability

ORACLE
EXADATA

High performance database platform for mission-critical workloads

Outcome

Greater scalability, performance and operational efficiency

- ✓ Better scalability to support business growth
- ✓ Improved performance for faster response times
- ✓ High availability and reliability for critical services

Key Impact

Optimized
Performance

Improved
Scalability

High Availability
& Reliability

Operational
Efficiency

Better Service for
Citizens & Businesses

Enabling SEPE to deliver **reliable**, **scalable** and **high-performance** services to millions of citizens.

GVA / LYRA (Valencia) | IBSalut + Únicas (Islas Baleares)

Driving **healthcare interoperability** and **digital transformation** across regional health ecosystems.

LYRA[®]
VALENCIA

únicas
ISLAS BALEARS

Challenge

Fragmented systems and lack of interoperability across healthcare providers

Multiple Systems

Heterogeneous systems and data silos across regions and providers

Contribution

Implementation of **FHIR** standards on **OpenShift** to enable interoperability and secure data exchange

- ✓ FHIR-based APIs and services
- ✓ Cloud-native architecture on OpenShift
- ✓ Secure and scalable integration platform

Outcome

Standardized delivery, improved integration and better patient care

- ✓ Standardized data exchange across regions
- ✓ Improved system interoperability and data quality
- ✓ Faster delivery of new healthcare services

Key Impact

Interoperability Across Regions

Secure & Standardized Data Exchange

Cloud-Native Architecture

Faster Time to Market

Better Patient Care & Outcomes

Delivering **interoperable**, **secure** and **scalable** healthcare solutions that **improve outcomes**.

ING / Santander / BBVA

Partnering with leading banks to **modernize platforms**, **enhance quality** and **accelerate digital transformation**.

Technology Modernization & Platform Transformation

- Core banking modernization
- Cloud migration & DevOps
- Quality assurance & test automation
- Agile delivery

- ✓ Modernized platforms
- ✓ Increased agility & efficiency

Enterprise Architecture & Quality Assurance

- Enterprise architecture evolution
- System integration
- Quality engineering
- Performance testing

- ✓ Improved system quality
- ✓ Optimized architecture

Digital Transformation & Platform Integration

- Digital platform development
- Integration & API management
- Test automation & continuous testing
- Cloud enablement

- ✓ Faster delivery
- ✓ Enhanced digital capabilities

Challenge

Legacy platforms, complex integrations and high expectations for speed, quality and reliability.

Contribution

Enterprise architecture, quality engineering and agile delivery to modernize platforms and ensure continuous quality.

Outcome

Faster delivery, better quality, improved performance and enhanced customer experience.

Key Impact

Faster
Time to Market

Improved Quality
& Reliability

Modernized
Platforms

Enhanced Customer
Experience

Operational Efficiency
& Cost Optimization

Helping leading banks **modernize**, **innovate** and **deliver value** in a rapidly evolving landscape.

AWS • Azure • OCI • Java • Kafka

Building on leading technologies to deliver **scalable**, **secure** and **resilient** solutions for our clients.

Cloud Platforms

AWS

Scalable, secure and highly available cloud infrastructure.

Microsoft Azure

Enterprise-grade cloud services for hybrid and multi-cloud solutions.

Oracle Cloud Infrastructure (OCI)

High performance, secure and cost-effective cloud infrastructure.

Core Technologies

Java

Robust, secure and portable platform for enterprise applications.

Kafka

Real-time data streaming and event-driven architecture.

Key Capabilities

Scalability

Elastic and On-Demand resources.

Security

Built-in security, compliance and governance.

Performance

High performance and optimized workloads.

Integration

Seamless integration and real-time data flow.

Our Expertise Across the Stack

Cloud Strategy & Migration

Application Development

Data Engineering & Analytics

DevOps & Automation

Security & Compliance

Monitoring & Optimization

Leveraging leading technologies to build **innovative**, **reliable** and **future-ready** solutions.

Delivery Models

Flexible engagement. Proven delivery. Measurable results.

OIKOS adapts to your needs with engagement models designed to **deliver value** at every stage of your journey.

Advisory & Architecture

Strategic guidance and architecture to build the right foundation.

- ✓ Enterprise Architecture
- ✓ Cloud Strategy
- ✓ Technology Assessment
- ✓ Governance & Roadmaps

Define the right strategy.
Build with **confidence**.

Project Delivery

End-to-end delivery of solutions with quality and efficiency.

- ✓ Technical Leadership
- ✓ Solution Design & Development
- ✓ Integration & Implementation
- ✓ QA & Testing

Deliver with agility.
Ensure **quality** at every step.

Managed Expertise

Extend your team with senior experts who drive results.

- ✓ Senior Consultants & Architects
- ✓ Specialized Engineers
- ✓ QA Leads & Test Managers
- ✓ Technical Project Managers

Scale your team.
Accelerate your **success**.

Aligned models. **Expert teams**. Consistent outcomes.

Proven experience. Measurable impact.

For over 25 years, OIKOS has partnered with organizations worldwide to deliver innovative solutions and **lasting business value**.

25+

**Years
Experience**

Deep industry knowledge and technical expertise.

30+

**Major
Projects**

Successfully delivered complex initiatives across sectors.

Why Clients Choose OIKOS

Two ways to work. **One commitment** to deliver.

Generic Consultancy

Generalists

Broad knowledge across functions and industries.

Mixed Profiles

Diverse experience levels and skill sets.

Delivery Only

Focus on execution and project delivery.

One Sector

Deep understanding within a single industry.

OIKOS

Specialists

Deep expertise in technology and business transformation.

Senior

Experienced professionals with proven track records.

End-to-End

From strategy and design to delivery and support.

Cross Sector

Extensive experience across multiple industries.

Flexible **engagement** models. Specialist **expertise**. Measurable **results**.

Specialized Domains

Deep expertise in critical domains that drive trust, security and efficiency.

OIKOS delivers advanced capabilities in identity, cryptography and biometric technologies to support **secure**, **compliant** and **resilient** digital ecosystems.

IAM & Security

Identity and Access Management solutions that protect and empower organizations.

- ✓ OIDC / OAuth2 / SSO
- ✓ Identity Governance & IAM
- ✓ Security Architecture
- ✓ Compliance & Risk Management

Biometrics

Biometric technologies for strong identity verification and fraud prevention.

- ✓ Face Matching & Recognition
- ✓ Liveness Detection
- ✓ Fingerprint & Multi-biometrics
- ✓ Secure & Privacy-preserving Solutions

Digital Signature

Trusted digital signature solutions that ensure authenticity and legal validity.

- ✓ eIDAS Compliant Signatures
- ✓ Certificate Management
- ✓ Long-term Validation (LTV)
- ✓ Secure Transactions & Workflows

Building **digital trust** with advanced identity, biometric and signature capabilities.

Integration Capabilities

Connecting systems, data and people.

Enabling **seamless, secure** and scalable digital ecosystems.

Kafka

Real-time streaming and event-driven architectures.

- ✓ Event Streaming
- ✓ High Throughput
- ✓ Scalable & Resilient
- ✓ Real-time Analytics

API Management

Design, publish, secure and manage APIs at enterprise scale.

- ✓ API Lifecycle
- ✓ Security & Policies
- ✓ Monitoring & Analytics
- ✓ Developer Portal

Oracle Service Bus

Enterprise service bus for robust integration and orchestration.

- ✓ Service Orchestration
- ✓ Protocol Mediation
- ✓ Routing & Transformation
- ✓ Reliability & Security

ESB / SOA

Service-Oriented Architecture for flexible and reusable integrations.

- ✓ Service Orchestration
- ✓ Loose Coupling
- ✓ Reuse & Governance
- ✓ Scalable Architecture

REST / SOAP

Standards-based integration for any enterprise need.

- ✓ RESTful Services
- ✓ SOAP Web Services
- ✓ Standards Compliant
- ✓ Interoperable

We integrate applications, data and processes to deliver **connected, agile** and **future-ready** solutions.

Secure. Reliable. Scalable. Integration that drives **business value**.

Building today what tomorrow needs. Creating the next generation of digital products and services.

Our **R&D+i** team explores emerging technologies and business models to design, develop and validate **innovative** solutions with real impact.

Innovation

Identifying opportunities and turning ideas into validated solutions.

- ✓ Product Discovery
- ✓ Market Validation
- ✓ Business Opportunities

Artificial Intelligence

Applying AI to solve complex problems and create intelligent experiences.

- ✓ AI Assistants
- ✓ Intelligent Automation
- ✓ Data-Driven Insights

Digital Platforms

Designing and building secure, scalable and resilient digital products.

- ✓ Cloud Native Solutions
- ✓ SaaS Products
- ✓ Scalable Architectures

Emerging Technologies

Exploring new technologies to shape the future of digital services.

- ✓ Real-Time Streaming
- ✓ Advanced Analytics
- ✓ Future Digital Services

From consulting expertise to **innovative** products.

OIKOS Innovation Lab

Exploring new ideas, technologies and business models to create **future-ready** solutions.
